

Dear TM471-II students,

Concerning the Presentation, each student has to prepare a power point presentation that should cover the main points presented in the report. About the content of the presentation, the following points represent a general guideline but you can apply any change if necessary:

- Cover page [Title, names, section, etc.] (one slide)
- Problem and motivation (one slide)
- Solution and deliverable in case of software project (one slide)
- Goals of experimentation in case of non-software project (one slide)
- Literature study / Related works (two slides)
- Software, hardware, and functional requirements (two slides)
- Initial design diagrams (2 to 4 slides)
- Implementation part in case of software project (2 to 4 slides)
- Experimentation part in case of non-software project (2 to 4 slides)
- Testing & results in case of software project (2 to 4 slides)
- Results & analysis in case of non-software project (2 to 4 slides)
- Conclusion & future work (two slides)

You should add voice explanation (in English) to your slides as this feature is available in Microsoft PowerPoint. The file size should not exceed 19 MB. If your presentation exceeds 19MB, then submit one slide that includes a link to the full presentation posted on the Cloud (GoogleDrive, OneDrive, etc.).
